Manure Happens Take Credit!

University of Nebraska Lincoln

Land Application Trainings

February 4-15, 2013

Learn basic manure management techniques and tips to keep the environment safe and you in compliance with your NPDES permit.

Who Should Be There?

- Recently permitted operations that have not completed the initial Land Application Training should attend the all day program. Participants attending all day (approx. 6 hrs.) will receive NDEQ Land Application Training certification.
- Additional educational training is required every 5 years for permitted operations. If you are unsure of your certification status, contact Leslie Johnson (UNL, 402-584-3818) or Ken Lamb (NDEQ, 402-471-4233). Farm representative attendance for the first 2 hours will fulfill NDEQ Land Application recertification required every 5 years for permitted operations.
- Farm staff and advisors implementing farm's permit or nutrient plan are welcome and encouraged to attend. Consider making this workshop part of your staff's training.

What Does It Cost?

- All Day: $50 per operation plus $10 per additional operation participant(s).
- Recertification: $10 per participant
- Fees will be due upon arrival at the location. Please do not send fees with your registration.

Where And When Can I Attend?

Date	City
February 4, 2013	West Point and York
